PROJECTS

Portfolio Website
Solo Project

Designed and developed a responsive website using HTML and CSS to showcase personal growth, goals, and projects. Hosted on GitHub Pages, demonstrating proficiency in web design, version control, and deployment.

Company Website
Professional Experience

Enhanced a company website by integrating HTML, CSS, and JavaScript with HubL on the HubSpot CMS. Created reusable custom modules, modified existing code to meet updated requirements, and reorganized site structure to improve navigation and overall user experience.

Minecraft Database
Solo Project

Built a MySQL database to organize projects within a Minecraft world, tracking locations, materials, and other project details. Gained hands-on experience in database design, table relationships, and writing queries to efficiently manage structured data.
